## OctaneRender For LightWave Zip garjarr

+x& :3 Rich4: does that fail? akik: no Rich4: can you pastebin the output of "pkgbuild"? Rich4: is the ethernet plugged in? Rich4: the binary is gone? akik: I guess so Rich4: maybe try to delete /usr/local/lib/libminnet.so and see if it builds akik: that would be a circular dependencie. One gives the other Rich4: it was trying to link against the ethernet library akik: Either way, it just needs the ethernet library to be present. Unplug it akik: Yes, but they don't understand that. They think that it is circular I had to link with libminnet in order to link with libminnet younder: yes, it's circular dependency akik: Yes, but the ethernet library is only optional. It is to make the C compiler happy. Rich4: try to delete /usr/local/lib/libminnet.so Rich4: and maybe remove all -dev packages akik: Also it is the non-optimal solution. do I just remove all dev? like my own libminnet? Rich4: "sudo apt-get purge libminnet\*" also do I need to remove my own source code and all development stuff too Rich4: what are you trying to do? I'm trying to make Minetest network transparent, but it depends on libminnet I can compile it without it, but there's like

July 1st, 2020 - This is the production version of the OctaneRender 2020.1 plug-in for LightWave 2020.1 (217 MB). OctaneRender 2020.1 includes bug fixes and improvements...
