Jun 1, 2020 You download the vSphere Software from the vCenter Server Update Site. Then install the . Feb 10, 2020 You obtain an evaluation license when you download the VMware vRealize Log Insight Server product support pack. Upgrade precheck of VMware vRealize Log Insight Server to version 5.0.0 . The VMware Log Insight Server is responsible for storing the logs and sending them to VMware Log Insight. The vRealize Log Insight Server includes several built-in functions: Log and attribute searching with Smart Host and Database filtering Log and attribute exporting with Elasticsearch indexing Smart Host and Database health monitoring A dashboard for further analysis of logs Monitoring of the VM and host performance Generating the log bundle Generating the log bundle is done in one of two ways: vRealize Log Insight Server generates the log bundle on its own, based on the following prerequisites: The new VMware vSphere and VMware vRealize Log Insight versions are installed on the same

ESXi host (or separate ESXi hosts). The ESXi hosts use the same TCP/IP port.

The ESXi hosts use the same VLAN. At least one VM has a license and a license is registered with the Operations Manager. If any of the prerequisites are not met, or the ESXi hosts are not in the same network, the log bundle cannot be generated. The log bundle can be exported to the ESXi host using the VMware Log Insight Server or a ESXi host running vRealize Log Insight Agent. The vRealize Log Insight Server supports the following ESXi version: VMware ESXi 6.5 U3. The vRealize Log Insight Server can export the logs in several formats: Datastore – Export as
