User interface Autodesk's Inventor offers customizable user interface (GUI) features. Not only can users change and create text boxes, buttons, tabs and links, but users can easily modify each element's position, color, size, scale, tool tip text, and typeface. In addition, any shapes or elements can be created by the user to generate custom icons and graphics. Inventor also allows users to create custom controls, including scroll bars, tooltips, menus, and dropdown menus. These controls can either be user-defined or pre-designed by Inventor. I have a test case class named TestNotification.php: `assertTrue($test->isSomethign()); } }` This class is in `/Test/Notification/TestNotification.php` file, and I'm trying to run this test case using `phpunit` command, like this: `~/my-project/Test/Notification/TestNotification.php > phpunit` If I want to test the other file, like `TestNotification.php` `~/my-project/Test/Notification/TestNotification.php > phpunit TestNotification` How do I change the directory path above? Can I specify the extension of the file name? I tried many ways, but no luck. A: You need to tell `phpspec2` to use your test file: Go to `phpspec2.php` Change the `testSuffix` option to suit your file name Then you can run: `phpunit -c phpspec2.ini --testsuite test_notification` For more information, see the `phpspec2` documentation. 1. The Italian newspaper La Repubblica reported that cardinals and bishops in private meetings had warned bishops in the region of Bologna of the dangers of what they called “profligacy” with the sacraments. Cardinal Angelo Bagnasco, former head of the Bologna diocese, was quoted as saying that the allegations were unacceptable. “The sacraments are not what we think,” he told the newspaper. “They are not the medications that allow us to have a moment of peace with God. The sacraments are a sign of the heart of Christ, not of the body.” The archbishop of Bologna, Cardinal Francesco Bela, told Vatican Radio that the pope had not taken part in the discussions but that the message was of great concern. “There are risks, we know, and we are well aware that these risks are great.
